Topics Discussed:

We discussed on the tasks we had been assigned on requirements specification of our software. We collaborated and discovered new insights on some features of the system that we did not consider beforehand.

Decisions Made:

We decided on the properness of the requirements each of us had extracted from our project point of view.

When registering a business, we need to make sure the company is an existing company not a fake one and their NIPT code will be asked for it to be registered. While discussing, we noticed some very interesting details pertaining ethics. Users below the minimal legal age of work should not be allowed access in the system. (Regarding the Albanian law, you have to be above 16 years in order to work).

Tasks Assigned:

We need to further improve our individual tasks on requirements specification.

Time, Place, and Agenda for Next Meeting:

The next meeting is arranged for April 12th, 2017. Time: 8:45 at Computer Lab 2. We will report on our weekly tasks and finalize the requirements specification of Jobify.al.
